Bremen, 26.10.2017

Dear Sir or Madam,

for the 01.11.2017 we have planned a release change for the ALPO system. The reason for this release change is the realisation of ZAPP-circular 36. In addition to the changes requested by DAKOSY, we have taken the opportunity to make some improvements:

- **ZAPP:**
realisation of the requirements from the ZAPP circular-36 by DAKOSY and revision of the English translations.
- **BHT:**
The search of container type by ISO code has been changed; now the translation of the entered ISO code is automatically made in uppercase letters. A new hint in the search for ships is to facilitate the handling: "For search results please enter the name of the port OR the name of the vessel along with the name of the broker".

For further information please feel free to contact your product representative.

Best regards
