RELEASE NOTES ALPO VERSION 1.36 -RELEASE CHANGE ON 12.12.2017

Dear Sir or Madam,

for the 12.12.2017 we have planned a release change for the ALPO system. We would like to provide you with some changes and bug fixes before Christmas.

- **Port Base:**
New: You can now use customs document type ICT or inner community trades, CMR, T2L or commercial invoices and enter the CMR or invoice number.
- **BHT:**
Bug fix: in the combination of order types 083 and 053 you may now also add AsumA data.

Bug fix: Customisation of mandatory field information for the customs status codes (1000G and 1000N).

Change: In the dangerous goods screen the field *weight* is renamed as *gross weight*.

New: Two new flags are available in the order overview screen:
In case of at least one hazardous goods and/or AsumA position you can find a tick in 2 new columns at the end of the row.
The new columns can be moved to an individually chosen position.

VORSTAND
Marco Molitor
