

Release Notes

This document contains information about **V 4.2.21**, including bug fixes and new features in this release.

NEW FEATURES

- | | |
|------------------|---|
| ALPO-3350 | ZAPP - Preparation for DAKOSY Port Order XML Interface
Various preparatory measures were implemented for the introduction of the DAKOSY Port Order XML interface. |
| ALPO-3899 | New rule: VGM weight must be > 0
A new rule has been implemented that a VGM weight must be >0. |
| ALPO-3921 | BHT responses correctly assigned when BHT reference already exists.
BHT response processing has been adjusted so that BHT response message is assigned to the correct order if the BHT reference already exists in old, completed ALPO orders. |
| ALPO-2739 | Optimization of the "Edit voyage" function through pre-assignment
When using the "Edit voyage" function in BHT and ZAPP, the current ship data will be pre-filled in the search mask in future, so that the appropriate new departure can be found quickly by adjusting the ETS date. |

BUXFIXES

- | | |
|------------------|---|
| ALPO-3782 | WKS - Preparations for ATLAS-WKS changeover
Various preparatory measures for the introduction of the ATLAS-WKS system were implemented. |
|------------------|---|
