

Release Notes

This document contains information about **V 4.2.7**, including bug fixes and new features in this release.

NEW FEATURES

- ALPO-2777 BHT Module: Extension "Actions" Menu**
The "Actions" menu in the BHT order editor has been expanded to include the actions "New (follow-up job)", "Copy (initial order)", "Create template" and "Remove". This now enables better continuation of work with search results from the Sm@rtFinder.
- ALPO-2778 ZAPP Module: Extension "Actions" Menu**
The "Actions" menu in the ZAPP order editor has been expanded to include the actions "Copy order", "Create template" and "Remove". This now enables better continuation of work with search results from the Sm@rtFinder.
- ALPO-2779 APCS Module: Extension "Actions" Menu**
The "Actions" menu in the APCS order editor has been expanded to include the actions "Copy" and "Remove". This now enables better continuation of work with search results from the Sm@rtFinder.
- ALPO-2780 Portbase Module: Extension "Actions" Menu**
The "Actions" menu in the Portbase order editor has been expanded to include the actions "Copy order" and "Remove". This now enables better continuation of work with search results from the Sm@rtFinder.
- ALPO-3203 All modules: Increase of simultaneously opened tabs**
Instead of the previous 7, up to 15 tabs can now be opened at the same time.
- ALPO-3254 All modules: Current information in the ALPO start window**
From now on, the ALPO start window will feature a "Current Information" tab containing important information on upcoming updates, dates or useful tips on how to use ALPO. These will be shown for a certain period of time and no longer appear after this period has expired. Via "Help -> Current information" the tab with the active information can be opened again. Likewise, use "Help ->Application Tips" to call up all tips (active and inactive).
- ALPO-3381 BHT Module: Processing Status IDU**
As soon as a BHT item has been assigned the IDU status, this is set to the header status for the entire order. It is then no longer possible to process the order with a GEA; only GZA and GSA are still permitted. (DBH-36452)

BUXFIXES

- ALPO-3290 BHT/ZAPP Module: Revision of Ship Search**
The ship search in the BHT and ZAPP module has been revised. Double-clicking on a voyage or selecting a voyage and clicking "OK" now transfers the voyage data to the order and closes the search window. Selecting a voyage and clicking "Apply" transfers the voyage data to the order, but leaves the ship search open.
- ALPO-3427 ZAPP Module: Event message "FEH" now contains detailed information**
The ZAPP event messages of type "FEH" now also receive status details, like other event messages.
